This data may be cited as:

Sam S. Rowan (2021). "Does institutional proliferation undermine cooperation? Theory and evidence from climate change". *International Studies Quarterly*, doi: [10.1093/isq/sqaa092](https://doi.org/10.1093/isq/sqaa092)

This codebook contains:

1. A full list of the climate institutions included
2. A description of the variables in the panel data
3. A description of the variables in the ideal points data
4. A description of the variables in the climate policy (NDC) data

1. Full list of institutions

File: `gcg_list_v1.csv`

Abb.	Full name	Created	Terminated	Finance?
aij	Activities Implemented Jointly	1995	2005	1
asap	Adaptation for Smallholder Agriculture Program	2012	.	1
aosis	Alliance of Small Island States	1990	.	0

sidslight	SIDS Lighthouses Initiative	2015	.	0
sffs	Soils for Food Security and Climate	2015	.	0
sccf	Special Climate Change Fund	2002	.	1
tfa2020	Tropical Forest Alliance 2020	2012	.	0
unredd	UN-REDD Programme Fund	2009	.	1

gip	UNIDO-UNEP Green Industry Platform	2009	.	0
unfccc	United Nations Framework Convention on Climate Change	1992	.	0
zrf	Zero Routine Flaring by 2030 Initiative	2015	.	0

Abb.: an abbreviation for the institution

Full name: institution's full name

Created: year an institution was created

Terminated: year an institution was terminated

Finance?: an indicator of whether membership in that institution is coded separately for donors and recipients (buyers and sellers of offsets, hosts of projects and buyers of those offsets; denoted with *_d and *_r in the dataset)

Data is collected from publicly available documents on these institutions' websites.

Data is current for December 2015.

More information on coding rules is available in the online supplementary information of: Sam S. Rowan (2021). "Does institutional proliferation undermine cooperation? Theory and evidence from climate change". *International Studies Quarterly*, doi: [10.1093/isq/sqaa092](https://doi.org/10.1093/isq/sqaa092)

2. Panel dataset

File: gcg_panel_v1.csv

The panel dataset contains yearly observations of membership.

iso3c: ISO 3-digit codes for 195 countries including the EU

year: Annual observations from 1988 to 2015. The "year" column is a "character vector" because it contains a "cross-section" entry after 2015 that summarizes membership to include institutions that were terminated by 2015.

sum_climate_institutions: Sum of climate institutional memberships in that year

eligible_climate_institutions: Sum of eligible climate institutions for membership, accounting for different climate finance expectations for Annex 2 and non-Annex 2 countries under the 1992 UN Framework Convention on Climate Change

share_climate_institutions: Percentage share of climate institutional membership in that year (sum divided by eligible)

afp:zrf: 63 institutions, some of which have membership coded separately for donors and recipients (see table above)

3. Ideal point measures of states' climate policy preferences

File: gcg_idealpoints_v1.csv

This cross-sectional dataset contains measures of 190 states' climate policy preferences, conceptualized as ideal points estimated from membership in the 63 climate institutions.

iso3c: ISO 3-digit codes for 190 countries including the EU --- countries with fewer than 3 institutional membership are not included in the estimation

sum_climate_institutions: Sum of climate institutional memberships in that year

share_climate_institutions: Percentage share of climate institutional membership in that year (sum divided by eligible)

d1_mean: Joiners score, IRT first dimension score, positive values join more institutions

d2_mean: Deepeners—fragmenters score, IRT second dimension score, deepeners have positive values, fragmenters have negative values

4. Climate policy, NDC, data

File: ndc_summaries.csv

This data frame contains summary information on countries' 2015 Intended Nationally Determined Contributions under the Paris Agreement on Climate Change. The underlying data is from:

- Robiou du Pont, Yann et al. (2017). "Equitable mitigation to achieve the Paris Agreement goals". *Nature Climate Change* 7 (1). doi: [10.1038/nclimate3186](https://doi.org/10.1038/nclimate3186)
- World Resources Institute. (Mar. 2015). *Countries' Pre-2020 Climate Pledges Submitted to the UNFCCC*. url: <http://cait.wri.org/pledges/>
- World Resources Institute. (2016). *Paris Contributions Map (INDCs)*. url: <http://cait.wri.org/indc/>
- Gütschow, Johannes; Jeffery, Louise; Gieseke, Robert (2019): The PRIMAP-hist national historical emissions time series (1850-2016). V. 2.0. GFZ Data Services. <https://doi.org/10.5880/PIK.2019.001>

iso3c: ISO 3-digit country code

ghg_2010: GHG emissions in 2010 (from Gütschow et al.)

cap_quota2030: GHG emissions quota for 2030 under CAP standard (from Robiou du Pont et al.)

cer_quota2030: GHG emissions quota for 2030 under CER standard (from Robiou du Pont et al.)

cpc_quota2030: GHG emissions quota for 2030 under CPC standard (from Robiou du Pont et al.)

epc_quota2030: GHG emissions quota for 2030 under EPC standard (from Robiou du Pont et al.)

gdr_quota2030: GHG emissions quota for 2030 under GDR standard (from Robiou du Pont et al.)

quota_median: Median GHG emissions quota for 2030 (from Robiou du Pont et al.)

flag_target: Categorical variable describing the observability of a country's NDC target

ambitionseen: Binary variable of observability (adapted from World Resources Institute)

ambitionseen2: Binary variable of observability with stricter conditions, excluding indexed GHG targets from analysis (adapted from World Resources Institute)

ambitionseen3: Binary variable of observability with strictest conditions, excluding indexed GHG targets, non-GHG targets and actions only targets from analysis (adapted from World Resources Institute)

copenhagen_ghgtarget: Binary variable of whether a country adopted a GHG target following COP15 in Copenhagen under the Copenhagen Accord/Cancun Agreements (adapted from World Resources Institute)

indc_emissions_2030: GHG emissions under NDC (from Robiou du Pont et al.)

indc_perc: GHG emissions under NDC, as a percentage of 2010 GHG emissions

indcshare_cap: GHG emissions under NDC as a percentage of CAP quota

indcshare_cer: GHG emissions under NDC as a percentage of CER quota

indcshare_cpc: GHG emissions under NDC as a percentage of CPC quota

indcshare_epc: GHG emissions under NDC as a percentage of EPC quota

indcshare_gdr: GHG emissions under NDC as a percentage of GDR quota

indcshare_median: GHG emissions under NDC as a percentage of median quota

indcshare_mean: GHG emissions under NDC as a percentage of mean quota
